made for putting relatively more focus on computer science (CS) and featuring it in every high school in the country. Computer science challenges students and teaches them to approach problems in new and rigorous ways. If taught properly, computer science courses instill creativity, critical thinking skills, and logical reasoning.

Computer science also is an active and applied field of STEM learning where students are able to engage in hands-on, real-world interaction with key math, science, and engineering principles. In addition to coding, it gives students opportunities to be producers in the digital economy, not just consumers of the technology around them.

### **Innovations in Computer Science and Engineering**

These innovations are the technologies that computer scientists had a direct hand in developing. For the remaining innovations, computer scientists played an important support role, developing control software for technologies like mobile phones, DNA testing and sequencing, MRI, microprocessors, and robotic surgery.
