An Introduction to Kernel Methods 157  $x_1$   $x_2$  Figure 1. The margin is the perpendicular distance between the separating hyperplane and a hyperplane through the closest points (these are support vectors). The region between the hyperplanes on each side is called the margin band.  $x_1$  and  $x_2$  are examples of support vectors of opposite sign. (Figure 1).

## What Can the Hilbert Schmidt SVD Do For Kernel-based

kernel-based learning methods have proved to be quite useful (Cristianini and Shawe-Taylor, 2000; Scholkopf, Smola, and Müller, 1998). Kernel-based learning methods are a class of statistical learning algorithms, the best known examples of which are SVMs (Cristianini and Shawe-Taylor, 2000).
